The meeting was attended by approximately sixty interested citizens.

Supervisor Cammarata opened the meeting by explaining this is a one-time chance to achieve a public sewer system, and introduced Jason Ebbs from LaBella Associates, the Engineers for the Town, who gave a presentation which included information about the entire project, from grant submission and private funding, the general engineering process, and specific construction issues. (See attached power point). Supervisor Cammarata explained the steps taken so far to seek additional funding to cover the difference in the construction costs since the original state grant was offered, the easement process, and what is meant by a benefit user, as well as a preliminary breakdown of costs to the individual benefit users.

Many of the attendees asked questions, which were answered by Supervisor Cammarata, Mr. Ebbs, and the Attorney for the Town.

Comments were positive, with the affected residents looking forward to the project being brought to fruition. Current estimates are that this will be completed in 2024.

The meeting was adjourned at 8:16 p.m.
