Dear Residents,

Blue Heron Construction Company (BHC) is currently preparing to install grinder pump **control panels** at each home that is registered with the Town of Kendall Sewer Project (anticipated panel install to start in August 2025 through September 2025). BHC will coordinate a meeting with residents to firm up locations of the control panel and grinder pump install. This will allow residents time to coordinate electrical hookup and inspection to the control panel ahead of the grinder pump installation process. Individual **grinder pump installations** are anticipated to start in late 2025 and ending in fall 2026.

If the location or questions arise after the meeting concerning the location of the panel or grinder pump please contact the foreman:
Matt Meyer at 585-734-0095 or email M.Meyer@blueheroncon.com
Please respect his time during off peak hours.

Thank you,
Blue Heron Construction

Electrical Requirements for Grinder Pump Installation & Panel

1. Electrical Service

A) The new Grinder Pump control panel requires a dedicated 30A/240V circuit. Within 60 days after the alarm panel installation, a dedicated 30A/2P circuit breaker must be provided in the electrical panel, and a feeder using four #10 wires (L1, L2, neutral, and ground) must be connected to supply power to the grinder pump control panel.

B) Terminations in the control box are required to come through the bottom of the control panel.

2. Inspection Required

The electrical work must be inspected by a licensed electrical inspector. The Town recognizes the following agencies:

- New York Electrical Inspection Agency
585-436-4460
- Middle Department
585-454-5191
- Commonwealth Electrical
585-624-2380

3. Submit Inspection Report

After the inspection is complete, submit the inspection report by email to **codee@townofkendall.com** or drop it off at the Town Hall.

Thank you,
Blue Heron Construction

PROOF & COLOR DISCLAIMER - COLOR SAMPLES PROVIDED UPON REQUEST Due to many factors, but not limited to the following: customer monitor calibration, printer manufacturer, paper used as well as design & viewing software, McAllister Sign cannot 100% guarantee color accuracy of electronic proofs. Customer is responsible for final proof and layout approval prior to printing. Approval is accepted electronically via email. With final approval the customer is verifying that spelling, grammar and content are all correct. The layout is accurate and the customer understands that item(s) will print as seen on the proof, less color accuracy (described in earlier section). After approval, McAllister Sign is not responsible for any errors made by the customer on the final print caused by any of these common reasons, but not limited to: omitted text or punctuation, mistyped and / or misspelled words, or incorrect grammar and / or punctuation.
